Capital Funds. Supervisor: Ismir Mulalic

RESEARCH STAYS

2014 Visiting PhD Student at *University of Manchester*, Manchester Centre for Health Economics

RESEARCH INTERESTS

My research focuses on developing a better understanding of physicians' supply of health care. To investigate this supply, I apply several different methods: I develop theoretical models and perform quantitative analyses using data from both administrative registers, surveys and laboratory experiments. Currently, I focus on two specific aspects of the supply of health care: physicians' motivational profiles and their behaviour under resource constraint.

AWARDS AND HONOURS

2020 Nominated for *Teacher of the Year* at the Faculty of Health Sciences

2018 Winner of the award for best poster and project on the development of teaching practices, University of Southern Denmark
